

# AI SOC Analyst

Dropzone AI replicates the techniques of elite analysts and autonomously investigates every alert

The cybersecurity industry has made significant advancements in the ability to detect malicious activity. This has generated a flood of alerts for security operations centers (SOCs) that will only grow. Today, SOCs are overloaded by alerts, leading to burnout and the constant worry of missing threats. Tier 1 alert triage and investigation is critical work, but it's tedious and requires 24/7 coverage.

Dropzone AI offers a pre-trained AI SOC analyst that autonomously handles Tier 1 alert triage and investigation for every alert. It replicates the investigative process and techniques of expert analysts, augmenting SOCs with unlimited cognitive automation to handle time-consuming and tedious SecOps tasks.

## Benefits

### Give your team time back

Stop wasting time on false positives. Automate Tier 1 investigations and spend more time on higher-value work, such as updating policies, incident response planning, and threat hunting.

### Find real threats fast

Quickly identify important alerts that are worth escalating so you can reduce MTTR and risk to your business. Eliminate the time that alerts sit in the queue before investigation.

### A trusted teammate that works for you

Add a smart colleague to your team who is ready to learn and works 24/7. Dropzone AI adapts to your environment, follows your instructions, and always shows its work.

	Human-only SOC	SOC with Dropzone AI
MTTR	Hours to Days	Minutes
Average Manual Analysis per Alert	25 Minutes	3-10 Minutes
Human Time Spent on Real Threats	10%	100%
Percentage of Alerts Investigated	30%	100%

PRESENTED BY Madrona

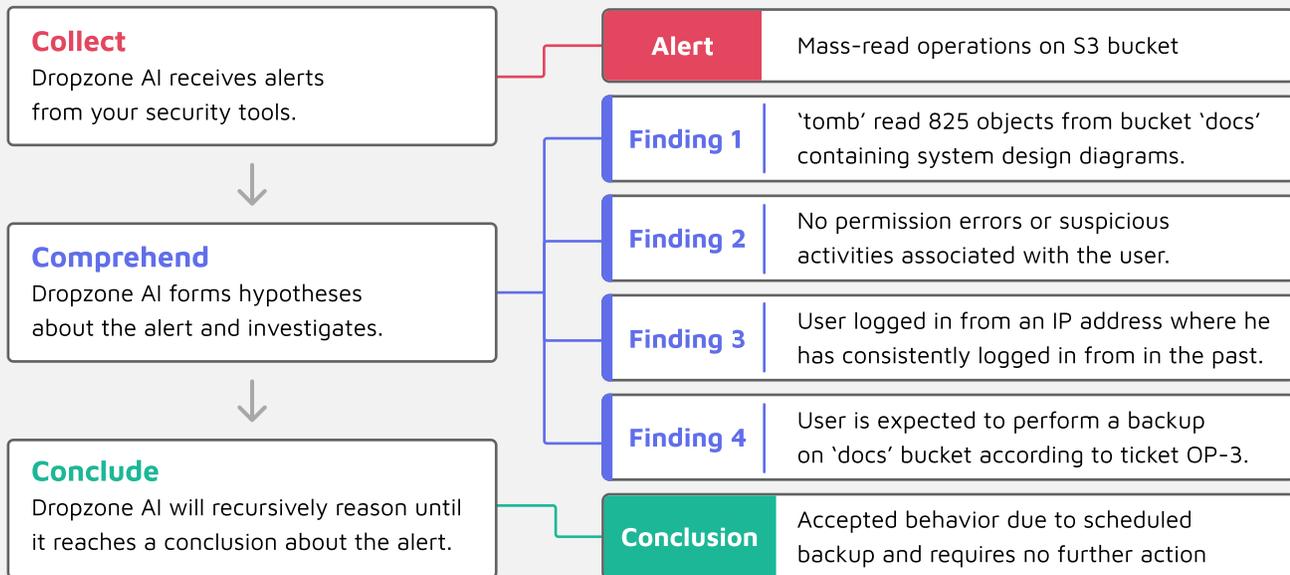

“Dropzone AI can fundamentally change the asymmetry in cyber defense. By using AI to handle routine tasks, it lets security teams focus on their top priorities.”

Caleb Sima  
former CSO, Robinhood

## How It Works

Dropzone's AI SOC analyst is an extension of your team that tirelessly investigates incoming alerts, using the same techniques and tools leveraged by elite analysts.

## Pricing

Starting list price is \$36,000 per year, with an annual contract. Pricing includes:

- ✓ Up to 4,000 full investigations per year per AI analyst
- ✓ Unlimited users
- ✓ All available security alert categories
- ✓ All pre-built integrations with your security and data tools
- ✓ Hand-picked threat intelligence and enrichment feeds
- ✓ AI chatbot for ad-hoc investigation
- ✓ Interact with engineers for support
- ✓ 8-hour customer support SLA

## Key Features

- Autonomous alert investigation
- Support for multi-tenancy
- Contextual memory
- 60+ integrations
- No automation playbooks, code, or prompts
- Interactive threat hunting

## About Dropzone AI

Dropzone AI revolutionizes cybersecurity operations by providing pre-trained, autonomous AI SOC analysts that work tirelessly alongside human teams. Built on advanced LLMs, Dropzone AI investigates and analyzes every security alert 24/7 without requiring playbooks, code, or prompts. It seamlessly integrates with your existing security tools, adapting to your environment to generate decision-ready reports that enable analysts to focus on critical threats. Dropzone's patented system reduces manual analysis time by 90%, helping organizations scale their security operations without adding headcount. For more information, please visit <https://dropzone.ai>
